About c3controls

Since 1976 c3controls (c3controls.com) has provided OEMs and electrical equipment builders a comprehensive portfolio of industrial control products that meet the most demanding applications. By maintaining strict control over the development and manufacturing of all products, c3 can provide customers extraordinary value through unmatched quality, competitive pricing, same-day shipping and a lifetime product warranty. This vertically integrated approach coupled with a direct sales model brings c3 closer to the end-user, fostering a degree of innovation that leads the industry.

Glossary of Terms

Water

Pump Stations:
Devices used to move water from a collection system to and/or through treatment. Common types include booster, centrifugal, stormwater, and submersible pumping stations.

Water Treatment:
The process of taking water, typically from the environment, and improving its quality for a desired end use. Common steps include coagulation, flocculation, sedimentation, filtration, and disinfection.

Coagulation & Flocculation:
Chemicals are added to water to neutralize the charge of dirt (coagulation) and bind particles together so they can be more easily removed (flocculation).

Sedimentation:
Using the effect of gravity to allow particles suspended in water to settle to the bottom of a tank prior to removal.

Filtration:
Passing water through a medium in order to remove any remaining small particles.

Disinfection:
Treating water with chemicals to eliminate any microorganisms and prepare for distribution and consumption.

Wastewater

Lift Stations:
A type of pump station designed to move wastewater, or sewage, to higher elevation using a collection system.

Wastewater Treatment:
The process of taking wastewater from a community, removing and eliminating contaminants, and releasing back into the environment. Common steps include primary, secondary, and tertiary treatment.

Primary Treatment:
Filtering out large solids from wastewater and then performing coagulation, flocculation, and sedimentation to separate 'sludge' and lighter substances.

Secondary Treatment:
Utilizing aerobic bacteria to biologically remove contaminants from wastewater, also known as 'activated sludge.'

Tertiary Treatment:
Filtration and disinfection processes increase the final quality of water and prepare it for discharge back into the environment.

Water/Wastewater

Department of Environmental Quality (DEQ):
Administers state and federal laws and regulations for water quality, water supply, and land protection.

Environmental Protection Agency (EPA):
Responsible for standards and the inspection of collection and treatment systems. The EPA OW (Office of Water) includes divisions such as the OWM (Office of Wastewater Management).

Pump Control Panels:
Also known as pump controllers, these panels manage the power components that control a pump motor, permitting easy and automatic pump operation and monitoring.

Treatment Plant:
A facility which takes water/wastewater from a collection system and performs a series of processes to prepare water/wastewater for a desired end use.

Industry Outlook

Essential for life, clean water is one of the most important resources on the planet. Treatment of water and wastewater has a critical impact on our health, ecosystem, economy, and so much more. This treatment comes at a premium as water and wastewater services utilize almost 50% of the energy in a municipality, of which 90% is used by pumps. As factors such as population growth strain aging infrastructure, an industry focus is finding new solutions that offer energy efficiency without sacrificing reliability.

For over 45 years, c3controls has been a leading manufacturer of electrical controls for water/wastewater treatment equipment. Our experience serving the industry has provided a deep understanding of challenges such as:

- **Supply chain issues** that bring long lead times for critical system components and subsequent delays.
- **Workforce shortages** that limit productivity and increase the need for automation.
- **High regulations** that ensure that processes, machines, and their components are up to code.
- **Complex controls** that call for the technological advancement of electronics.
- **Calls for sustainability and efficiency** that demand innovation in the form of flexible, multi-purpose equipment.

With these challenges come great opportunities for your business. As the industry continues to grow and evolve, now is the ideal time to upgrade systems to capitalize on industry trends and technological advancements. With the right parts, people, and processes, your application can stand out from the rest.

c3controls can help you succeed. We manufacture our products and do not source any major products from China. This allows us to operate more efficiently and respond to market conditions quicker. That means faster delivery for your industrial control products serving:

- **Pump Control Panels**
- **Pump Stations**
- **Lift Stations**
- **& more!**

With over fifteen million available product configurations, and our own UL508A panel shop, c3controls has the resources you need to adapt and capitalize on your water/wastewater business opportunities!

Disclaimer: For illustration purposes only. Other solutions may be applicable depending on your application design requirements.

1 	**22mm IEC E-Stops**	Non-Illuminated and Illuminated versions	UL Listed Polycarbonate enclosure rated for Type 1, 2, 3, 3R, 4/4X, 12, 13, and IP66	Meets EN418 Safety of Machinery global compliance standards	Operating temperatures from -40 to +55° C (-40 to + 131° F)	UV and corrosion resistant
2 	**UL 508 Disconnect Switches**	Door mount, panel-base mount, and panel mount with integral operator	Certified for use in Manual Motor Controller applications suitable as Motor Disconnects	16 - 125 Amps in 3, 4, and 5 pole configurations	Motor loads up to 40HP @ 480V (55kW @ 400V)	Operating handles rated for Type 1, 2, 3, 3R, 4/4X, 12, 13, IP55, and IP65
3 	**Pilot Devices**	Modular range of 30mm, 22mm, 16mm, and 13mm	Type 1, 2, 3, 3R, 4/4X, 12, and 13	Non-Illuminated, Illuminated and Keyed Operators in both maintained and momentary operations	Color-coded, snap-on contact blocks with angled captive screws and pressure plates	Full voltage, multi-voltage, resistor, and dual input light units in a wide range of voltages up to 600VAC/VDC
4 	**Miniature Circuit Breakers**	UL 489 & UL 1077	1, 2 and 3 Pole combinations	10kA SCCR @ 480Y/277VAC	Current ratings up to 63 Amps	B, C and D curve ratings
5 	**Motor Protection Circuit Breakers**	Multi-Function: Manual Motor Controller, Motor Disconnect, Group Motor Installations	50kA SCCR @ 480V	Self-protected Type E up to 50kA @ 460V	FLC up to 32 Amps	Trip Class 10 Thermal and Magnetic Elements
6 	**IEC Contactors**	9 to 105 Amps	100kA SCCR @ 480V and 600V with Class J fuses	AC and DC - electronic coil control on DC devices	Integral auxiliary	Up to 75 HP @ 400V (55kW @ 400V)
7 	**General Purpose Relays**	Square base, flange mounted, and miniature	Only 14mm wide	Transparent housing	Pole combinations available in SPDT, DPDT, 3PDT and 4PDT	Carrying current rating 5A-25A
8 	**Electronic Timing Relays**	Compact design, sizes in 17.5mm, 22.5mm, and 45mm wide	Single, dual and multi-functions	Timing ranges from 0.01 seconds to 9,999 hours	DIN Rail, Panel, Socket, and enclosure door mountings	Voltage inputs 20-240 VAC and 12-240 VDC
9 	**Overload Relays**	Available in five frame sizes with a current adjustment range of 0.28-112A	High fault SCCR of 100kA @480V and 600V with Class J fuses	Full load current adjustment ratio of approx. 1:1.5 enables relay to be set to exact FLA of motor	Single phase sensitivity to protect motors against damaging phase loss conditions	Manual or automatic reset and test modes, and stop button all in a single device
10 	**Terminal Block Relays**	Rated load: 6A, 250VAC/30VDC	Single-Pole, Double-Throw contacts	Screw termination	Most common AC/DC coil voltages: 12V, 24V, 110-125V, 220-240V	
11 	**Wire Duct & DIN Rail**	Wire Duct: 13 dimensions from 25mm wide up to 80mm, and up to 2m in length	Wire Duct: Narrow and Wide Slot	DIN Rail: 35mm rails in steel and aluminum	DIN Rail: 1m (3.28ft) or 2m (6.56ft) lengths	DIN Rail: Standard package quantities or pallet options available
12 	**Direct-On-Line Starters** (+enclosed)	Open-style starters consist of either a Contactor & Overload Relay, or a Motor Protection Circuit Breaker & Contactor	Enclosed starters come pre-wired with a variety of pilot device options	Factory assemblies provide the convenience of a single catalog number and shorter bill of material		

Product Portfolio

Our 15 million+ product configurations deliver durability and reliability—even in the most punishing environments—meeting and exceeding global standards for quality and safety.

- series DS — DISCONNECT SWITCHES
- series DS — ENCLOSED DISCONNECT SWITCHES
- series 1100 — MINIATURE CIRCUIT BREAKERS
- series 280 non-reversing / series 290 reversing — DEFINITE PURPOSE CONTACTORS
- series 300 non-reversing / series 310 reversing — CONTACTORS
- series 300 miniature / series 310 miniature — MINIATURE CONTACTORS & CONTROL RELAYS
- series 320 — OVERLOAD RELAYS
- series 620 — DIRECT-ON-LINE STARTERS
  CONTACTOR + OVERLOAD RELAY
- series E620 — ENCLOSED DIRECT-ON-LINE STARTERS
  CONTACTOR + OVERLOAD RELAY
- series 330 — MOTOR PROTECTION CIRCUIT BREAKERS
- series E330 — ENCLOSED MOTOR PROTECTION CIRCUIT BREAKERS
- series 630 — DIRECT-ON-LINE STARTERS
  MOTOR PROTECTION CIRCUIT BREAKER + CONTACTOR
- series E630 — ENCLOSED DIRECT-ON-LINE STARTERS
  MOTOR PROTECTION CIRCUIT BREAKER + CONTACTOR
- series 30 industrial — 30MM INDUSTRIAL PILOT DEVICES
- series 30 hazardous — 30MM PILOT DEVICES FOR HAZARDOUS LOCATION
- series 22 iec — 22MM IEC PILOT DEVICES
- series WTL — WORLD TOWER LIGHTS
- series CS — CAM SWITCHES
- series 22 nema — 22MM NEMA PILOT DEVICES
- series 16 — 16MM PILOT LIGHTS
- series 13 — 13MM PILOT LIGHTS
- series EC — CONTROL STATION ENCLOSURES
- series ECP 300 — ENCLOSED UL508A COMBINATION MOTOR STARTERS
- series TB — TERMINAL BLOCKS
- series TBR — TERMINAL BLOCK RELAYS
- series ETR — ELECTRONIC TIMING RELAYS
- series GR — GENERAL PURPOSE RELAYS
- series WD — WIRING DUCT

Why choose c3controls

Integrated Manufacturing

Vertical integration is the cornerstone of c3controls as it places innovation, development, design, manufacturing, testing, and shipping all within our control. With Everything Under Control, we can ensure the highest quality and customer satisfaction.

Innovation

Product innovation is in our DNA. We approach our products as solutions. Unlike our competition, our business model allows us to provide customers with premium controls without the premium price.

Same-Day Shipping

Reduce inventory. Improve cash-flow. Save money. Our customers enjoy peace of mind knowing they'll get what they need, when they need it. Our promise, guaranteed!

Limited Lifetime Warranty

With total control over engineering and manufacturing, we are able to guarantee the highest quality products on the market—products free of defects in material, workmanship, and design.

Advantage Pricing

Total control means lower overhead and direct sales. For our customers, this translates to savings of up to 40+% on c3controls premium products.

Customer First

Commitment to the success of our customers is a core value and the driving force behind all we do. We promise concierge style service that makes doing business easy, personalized, and responsive.
