## Terminal Block Relays

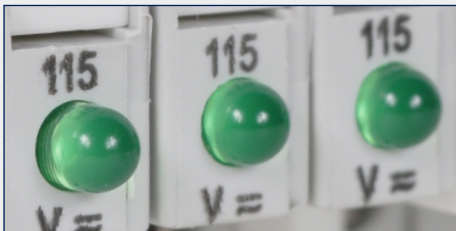

*A perfect switching solution for your Control & Automation Systems!*

### Solutions

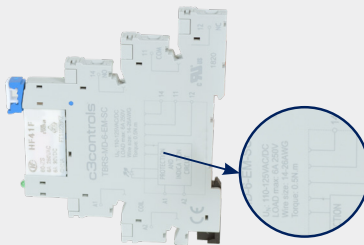

c3controls' Terminal Block Relays, perfectly designed to drive your process I/Os while providing safe & reliable connection and isolation!

c3controls' Terminal Block Relays were developed to meet your switching requirements in highly sophisticated control and automation systems. Due to their unmatched size, flexibility, and various other features, terminal block relays can help you save money and premium panel space.

#### Super Bright LED

Highly visible and bright LED on each unit gives indication of the relay's operating state.

#### Easy Reference

All the necessary installation markings including wire size and torque are available on the side of each terminal block relay.

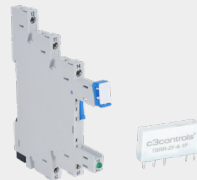

#### Quick Identification

Marking system allows for fast and easy circuit identification. A marking strip is pre-supplied on each unit.

#### Secure Installation

Quick, hassle-free installation on a 35mm DIN Rail.

#### Pluggable Relay

The marker base functions as a lever for installing or replacing the relay in case of troubleshooting or malfunction.

#### Protection

Built-in Leakage Current Suppression and Coil Surge Protection.

### Range

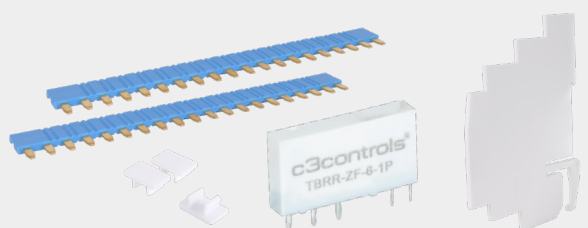

c3controls' line of Terminal Block Relays offers an exact range of products augmented with all the essential features, functionalities, and dependable performance for a range of switching applications.

The complete range of c3controls' Terminal Block Relays having industry leading specifications and characteristics, is an ideal solution for application switching through a controller.

#### TERMINAL BLOCKS RELAYS

- Rated load: 6A, 250VAC/30VDC
- Single-Pole, Double-Throw contacts
- Screw termination
- Most common AC/DC coil voltages: 12V, 24V, 110-125V, 220-240V

#### ACCESSORIES

- IP67 rated pluggable relay which can be installed/replaced using engagement lever
- 20 way jumper for ease of wiring
- 2mm wide spacer for differentiating between circuits
- Replacement marker

# Engineered for delivering reliable and high-end performance from your highly automated systems!

c3controls' Terminal Block Relays are a must have switching solution for the next generation control and automation systems.

### Proven

UL Recognized and CE Marked, Our Terminal Block Relays are designed to perform in a range of switching applications.

## Guaranteed Same-Day Shipping

### Added Reliability and Safety

IP20 rated captive screw terminals provide reliability, ease of wiring, and much needed protection against accidental contact with live parts.

## Backed with a Lifetime Warranty

### Environmentally friendly

Environmentally friendly contacts are cadmium free and non-metallic materials are asbestos, halogen, and cadmium free. All c3controls products are compliant to the RoHS directives.
