

Wiring Duct

Solutions

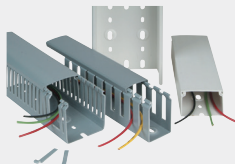

Increase productivity and reduce installation costs

c3controls Series WD Wiring Duct and accessories speed your wire/cable management and installation. The wide variety of types and options will increase productivity, reduce installation costs, and will give you the most attractive and organized control panels in the industry!

Simple Installation

Mounting hole patterns with elongated slots comply with DIN 43659 for global installation flexibility.

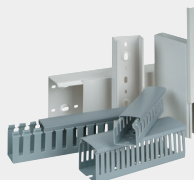

Sleek Design

Flush side-wall and duct provide increased wire capacity and a pleasing, finished look.

Fast Wire Organization

The V-shaped slot lead-in makes wire insertion fast and easy.

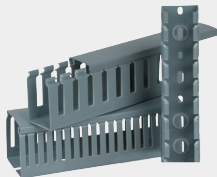

Customization

Two slot types are available to meet your capacity and flexibility needs: Narrow Slot for more precise wiring and Wide Slot for larger wires and bundles.

Optional Adhesive Backing

Put an end to all the eyeballing with c3controls' optional adhesive. It's an ideal convenience feature that allows you to temporarily stick your wiring duct where you want it on the panel before you permanently mount it. Just position, press, then drill and tap. Now that's convenient.

Environmentally Secure

Non-flammable (UL94 V-0), rigid PVC won't warp, peel, chip, crack, or become brittle, and resists oil, salt solutions, and fungus for superior performance in any environment.

Reduced Inventory

Smaller standard package quantities, bringing you more control over your inventory.

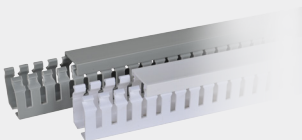

Easy Identification

Complete catalog number and dimensions printed on the side of the duct for quick identification and utilization.

Range

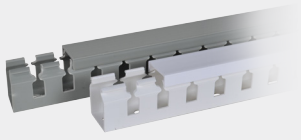

The Perfect Range of Wiring Duct

We offer a wide range of styles and sizes that will match all of your wiring wants and needs.

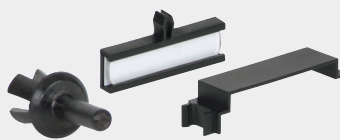

NARROW SLOT

- Rigid, "U" shaped duct with non-slip cover
- Available in grey and white
- 13 selectable dimensions from 25mm wide up to 80mm, and up to 2 meters in length
- Optional adhesive backing for convenient and fast installation
- The option to choose from one of our popular configurations or the ability to create your own custom wiring duct

WIDE SLOT

- Rigid, "U" shaped duct with non-slip cover
- Available in grey and white
- 13 selectable dimensions from 25mm wide up to 80mm, and up to 2 meters in length
- Optional adhesive backing for convenient and fast installation
- The option to choose from one of our popular configurations or the ability to create your own custom wiring duct

ACCESSORIES

- Mounting Inserts, Universal Cable Tie Attachments and Wire Retainers are easy to install and make organizing wires inside the duct easier and faster while providing a professional and clean appearance
- Nylon Rivets and Mounting Clips assist in installation of the wiring duct directly to the panel or to 35mm DIN rail
- Duct Covers are available for all ranges, and also come standard with the wiring duct

Engineered to a Higher Standard

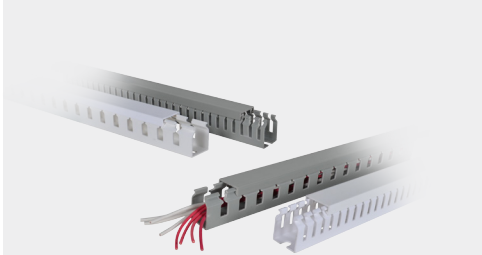

Engineered for durability and easy installation, c3controls’ line of Wire Duct deliver convenience, safety, and reliability in applications exposed to high vibration.

Proven

Our Wire Duct covers are UL Listed and CE marked, and RoHS compliant for global acceptance.

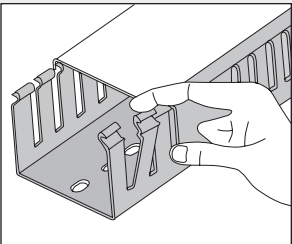

Guaranteed Same-Day Shipping

Vibration Resistant

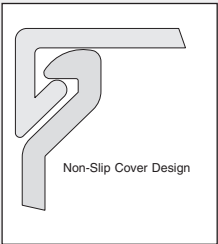

Restricted slot design ensures that wires are held in place, even when the cover is not installed, allowing for durable performance in high vibration applications.

Backed with a Lifetime Warranty

Safe Handling

Smooth, rounded edges on duct fingers and covers prevent cutting and abrasions to hands and wires.

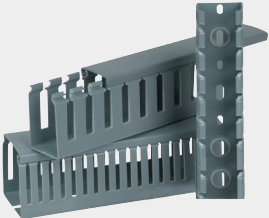

Non-Slip Cover

Interlocking, non-slip cover with two contact points prevents the cover from sliding, even in high vibration applications—and ensures a rigid duct assembly.

Convenience

Snap-off, side wall fingers are scored to easily enlarge slots for any size wire or wire bundle. No tool is required to “snap-off” fingers, and scoring ensures clean break-offs, eliminating sharp edges.

Environmentally Secure

Non-flammable (UL94 V-0), rigid PVC won't warp, peel, chip, crack, or become brittle, and resists oil, salt solutions, and fungus for superior performance in any environment.
